18. Page 28, line 38: after “June 8, 2019.” add new paragraph “I also noticed that Taylor’s body was somewhat stiff. Rigor mortis is the stiffening, or a hardening of the skeletal muscles. Rigor mortis generally sets in about three to four hours after death, peaks at 12 hours, and dissipates after 48 hours, or even longer when a body is in water. Given the fact that Taylor’s body was not completely stiff either at the time I examined Taylor or at 10:00 when I performed the autopsy, I did not think rigor mortis was helpful in determining the time of death.”
